

Long Beach Unified School District  
**School-of-Choice Participation and Traffic Creation**  
 Elementary and Middle Schools  
 2013 - 2014 School Year

School-of-Choice census data provided by Long Beach Unified School District. Analysis performed on May 6, 2015, by the School Neighbors Association based in Long Beach, California ([www.schoolneighbors.com](http://www.schoolneighbors.com)). Map completed July 18, 2015. School-of-Choice traffic participation calculations assume that each School-of-Choice student participant results in two vehicle trips per day: one for student drop-off and one for student pick-up. Vehicle trips / day statistics are for School-of-Choice and do not include traffic from other sources, such as normal local school traffic, school staff, and school visitors.
